

RESOLUTION
Presented to Academic Senate May 1, 2018

FULL TIME FACULTY REGULAR AND SUBSTANTIVE ONLINE COURSE REVIEW

Whereas faculty who teach online courses must demonstrate “regular and substantive faculty/student interaction” as part of a quality class, and

Whereas to provide full-time faculty training and guidance on the meaning of “regular and substantive faculty/student interaction” peer reviews need to take place to ensure that their online classes meet the RSI standards supported by the Academic Senate,

Resolved that the Coast Federation of Educators make an agreement with Coastline administration and the Coast District that all full-time faculty have their online classes reviewed for “regular and substantive faculty/student interaction” on a yearly basis without this review being in any way considered as part of any peer evaluation, and

Resolved that this “regular and substantive faculty/student interaction” online course review will be conducted only by full-time tenured faculty at Coastline, and the selection for these faculty reviewers will be determined by a group defined by the Coastline Academic Senate and Coastline Administration, and

Resolved that full-time faculty who do not meet RSI standards approved by the Academic Senate will be provided training and other resources with written suggestions for improvement and date(s) for satisfactory compliance with these standards, and

Be it finally resolved, that should a full-time faculty member not demonstrate adequate “regular and substantive faculty/student interaction” in their online course after a second peer review and fail to meet Coastline Academic Senate RSI standards, the following actions may be taken in the progression only after discussion with the affected full-time faculty member as follows:

The full-time faculty member:

1. May be denied teaching assignments of military classes,
2. May be denied over-load assignments
3. May be assigned only site-based classes
4. The Vice President of Instruction may write a letter of reprimand
