## Child and Adolescent Development (CHAD) Associate in Arts for Transfer

The Child and Adolescent Development Associate in Arts for Transfer was designed specifically to address the teacher shortage in California and as an alternative choice for students interested in the interdisciplinary field of Child and Adolescent development either as a stand-alone paraprofessional degree or a career ladder for transfer. This degree gives students the lower division preparation required by CSU's to pursue alternative career paths in child and adolescent development such as elementary or special education teaching and other careers working with children and families.

The Child and Adolescent Development Associate in Arts for Transfer is especially designed to meet the needs of students interested in an education/ teaching related career who prefer online classes and/or cannot always attend traditional face-to-face classes due to employment, marital status, family responsibilities, distance, and expenses incurred with traditional education schedules.

Besides the option for a stand-alone degree, coursework is at the same time designed to meet the needs of students planning to transfer for further studies in the interdisciplinary field of Child and Adolescent Development, and to transfer to a CSU into programs in Child Development, Human Development, Child and Adolescent Development, Family and Consumer Sciences, and Liberal Studies (Child Development/Teaching).

Included is the major pattern for students planning to transfer to a CSU. It is strongly recommended that students contact a Coastline counselor to develop an official Student Educational Plan to discuss optimum course selection for a terminal degree for a paraprofessional or optimum course selection for transfer purposes, non-CSU universities, or if they have questions about the Child and Adolescent Development Associate in Arts for Transfer for CSU Transfer.

This degree is separate from the Associate of Science for Transfer in Early Childhood Education, which prepares students to transfer to CSU campuses that offer bachelor's degrees in Child Development and Early Childhood Education. Students interested in preschool teaching and receiving their Child Development Teaching Permit should complete the requirements for an Early Childhood Associate in Science for Transfer. However, students who complete the Child and Adolescent Development Associate in Arts for Transfer and choose to take other child development coursework as their electives will also be able to qualify for employment in the field of Early Childhood Education, as well as earn a Child Development Permit issued by the California State Commission on Teacher Credentialing

Ed Code Section 66746-66749 states students earning the Child and Adolescent Development Associate in Arts for Transfer will be granted priority for admission as a Child Development major to a CSU, as determined by the CSU campus to which the student applies.

The following is required for all transfer degrees, and there are no additional graduation requirements: (1) Completion of 60 semester units or 90 quarter units that are eligible for transfer to the California State University, including both of the following: (a) The Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education – Breadth Requirements. (b) A minimum of 18-semester units or 27 quarter units in a major or area of emphasis, as determined by the community college district. (2) Obtainment of a minimum grade point average of 2.0. (3) ADTs also require that students must earn a C or better in all courses required for the major or area of emphasis. A "P" (Pass) grade is not an acceptable grade for courses in the major.

## Career Opportunities in Education

Most common career opportunities with a baccalaureate degree in Child Adolescent Development may include: elementary and secondary education, social work, counseling, child-care worker, parent educator, community service provider, child and youth advocate, after-school program staff, researcher, and program administrator.

Students completing an associate's degree in Child and Adolescent Development are qualified to work in school districts

# Coastline College: TEACh3

as classroom paraprofessionals and for social services programs, entry level positions.
