

Coast Community College District
BOARD POLICY
Chapter 4
Business Operations

BP 6960 Energy and Resources Conservation

The Board recognizes the responsibility of the District to: reduce resource wastes to as low a level as is practicable without compromising the basic mission of the District, to help students and members of the community understand the need for wise use of natural resources; to promote an understanding of the relationship between reduced consumption and the quality of our environment; and to demonstrate leadership in voluntary efforts to reduce use of certain critical resources.

Furthermore, the Board recognizes the need to provide the necessary funding to assure maximum effectiveness of the program.

A program of effective energy and other resources management must be vigorously pursued in order to maintain a stable academic and physical environment. Recognizing this need for a cooperative campus and community effort, the Board directs the Chancellor and Presidents to formulate and maintain a program of effective energy and resources conservation.

Adopted September 3, 1986
