Imagine you bringing this to life.
Expand...

the Newport Beach dream
People have said you’re living the dream. You think back on your accomplishments and they are noble, commendable, acclaimed. But, there’s always room for a few more accolades…right?

What if there was a way for you to change lives by supporting education? After all, it’s what made you what you are today. Whether you were educated at a traditional college, the school of life, or in the school of hard knocks, you know that learning and mastering the ability to learn has been your key to success.

Now, imagine paying homage to education right here in a town that you live in, work in, play in, and love: Newport Beach.

We’re building a college in Newport Beach—not just a college, Newport Beach’s first comprehensive community college—and we need your help to make it happen.
You see it every day as you drive down PCH—that vacant hillside. Some may even claim that it’s not Newport, but those who are business-sawy know that this—THIS—is the last untapped jewel of Newport.

With the rise of office buildings, shopping centers, and housing developments all around it, this small strand of sleepy industrial buildings managed to dodge development and attention…until now.

This is the site of Coastline’s Newport Beach Campus. Just as the adjacent Banning Ranch site will transform this fringe of Newport into a beautiful live, work, play community, the Coastline Newport Beach Campus will bring education to the mix and invigorate the area with core curriculum, PE, Dance and Art classes, and a community Art Gallery.

Just as a palindrome has a beginning and an end that mirror each other perfectly as one, this college will mirror—in both beauty and in brains—the prestigious beach community it shadows.

---

**Measure C**

The Coastline Newport Beach Campus will be built with Measure C funds—a $370 million bond measure that has already financed a number of facility and infrastructure improvements at Coast Community College District colleges. Measure C was originally approved by voters in 2002 and has positively impacted thousands of students.
Just 3.91 acres.

It may not seem like a lot, but in that space lies the potential for something great. Today, it appears as a jumble of boarded-up buildings surrounded by years of growth. A chain-link fence restrains a portion of the property while the other half mocks modernization with a look inconsistent with its scenic Newport Beach surroundings. You see an area in dire need of attention. We see a campus.

Not only will Coastline’s Newport Beach Campus serve as an aesthetic improvement to the area, but the existence of a community college site within the City of Newport Beach will positively impact property values.

The campus will serve as an educational resource as well as a social gathering place for local residents, young and old, as it embraces the following programs:

- Art courses
- Community Art Gallery
- Music courses
- Theatre courses
- Dance courses (with a professional dance studio)
- General education courses
- Foreign language courses
- Paralegal program courses
- Parent education classes
- Special programs for the disabled
- Early College High School
Whether your gift is a small amount, a large amount, or the precious gift of time and leadership, your involvement showcases your lifetime commitment to doing the right thing. The Coastline Foundation is spearheading this effort to change the landscape of upper Newport Beach, but they cannot do it alone. Just as you were called upon in the past to help build a family, a company, or a community, the Coastline Foundation humbly asks for your hand again in building an educational community with programs and services to serve thousands of students—your descendants—for years to come.

**Education is about transformation and change.**
Transform lives and change Newport Beach forever by:

**Endorsing the campaign.** As a prominent and respected member of the community, your words matter. Use your influence to stimulate awareness and attention to this very special project. Help us to “gather the troops” and build a support team to carry this project from concept to completion.

**Inviting us to speak.** We would be thrilled to have the chance to meet your connections, and can plan presentations for your company or organization about the planned Newport Beach campus, about higher education funding challenges and opportunities, or about our upcoming Foundation activities.

**Joining a committee.** Take on a leadership role by contributing your talents in planning and organization to facilitate committees that will shape the programs, services, and curriculum offered at this new campus. Numerous opportunities for participation are available depending on your level of interest.

**Making a personal contribution.** Set an example for others by making a personal contribution to the campaign for the Newport Beach Campus. Your donation will be used to enhance the programs and services planned for this center, and will also be used for scholarships to help students from Newport Beach and the surrounding area pursue an education and have a greater chance at success.

**Staying informed.** Join us for activities, briefings, and events to learn more about the challenges and opportunities in today’s higher education landscape. By attending Coastline Foundation events, you’ll also become connected to other professionals in the community who share your passion for education and your support of Newport Beach’s goal for a college of its own.

The future of our community depends upon an educated and vital workforce that can help Newport Beach remain a leading innovative and thriving presence. By contributing time or money to the campaign for Coastline’s Newport Beach Campus, you’ll be forever connected to a transformative experience for this community.

It's all coming together now.
...can a campus be literally “alive?”

If you ask our architect, LPA, Inc., the answer is a resounding, “yes.”

It’s funny how three little words can come together to form such a powerful statement, but we’re all about collecting things for the benefit of a greater good. As people come together to support this campaign, and put their dollars together to build a campus, magic starts to happen. From what was once a vacant lot next to a lonesome hillside rises a center that is life. It invites life as students from Newport Beach flock to it for knowledge and activities. It stimulates life through the emphasis of learning and creative expression. It supports life through services and interaction. Metaphorically speaking, this campus is life. But, can a campus be literally “alive?” If you ask our architect, LPA, Inc., the answer is a resounding “yes.”

LPA, Inc. is renowned for their green buildings. They built Newport’s LEED Platinum-Certified Environmental Nature Center to the highest green standards, and now we’ve teamed up with them to build one of the greenest campuses possible, so green that it will also qualify for LEED certification.

About the architects

Counterclockwise from top left: LPA-designed buildings include the OCC Lewis Center, the CSUSB College of Education, and the Jet Propulsion Laboratory.

Founded in 1965, LPA has more than 225 employees with offices in Irvine and Roseville, California. LPA provides services in architecture, engineering, interior design, landscape architecture, planning, signage and graphics. They have more LEED-certified buildings than any firm in the state and of their employees, more than 70 percent are LEED accredited professionals.

With extensive experience in public and private architecture, LPA designs a diversity of facilities that span from civic and corporate establishments to K-12 schools, colleges and universities. Their passion for design in the sphere of Higher Education manifests itself in more than 80 projects, 25 of which were completed during the past five years and won 37 awards for excellence in educational design.

What makes it green?

- Not encroach on existing open space by re-utilizing an already occupied lot.
- Utilize native plants and drought-tolerant landscaping around the building and atop the living roof.
- Be irrigated with reclaimed water.
- Be strategically located to serve the immediate population, minimize car trips to other college campuses, and reduce area traffic.

LEED certified

What does it mean? It means that a building is worthy of third-party certification due to its green design, construction and operation. LEED promotes a whole-building approach to sustainability by recognizing five key areas of human and environmental health: sustainable site development, water savings, energy efficiency, material selection and indoor environmental quality. It’s green...inside and out.

Expand. Invigorate. Educate.

Coastline’s new campus in Newport Beach will be built by LPA, Inc. with LEED certification guidelines in mind. Specifically, the campus will:

- Not encroach on existing open space by re-utilizing an already occupied lot.
- Utilize native plants and drought-tolerant landscaping around the building and atop the living roof.
- Be irrigated with reclaimed water.
- Be strategically located to serve the immediate population, minimize car trips to other college campuses, and reduce area traffic.

Envision...
Imagine...
you bringing this to life
Newport Beach’s first full-service college campus will serve the community with a number of programs and services. Within its eco-friendly grounds, you’ll find dedicated instructors teaching English, history, humanities, mathematics, foreign languages and more.

As home to Coastline’s visual and performing arts programs, music will penetrate the halls and budding artists will refine their talents—using the building’s hallways and its on-site Art Gallery as a showplace for their work. The campus will also be home to a professional dance studio for those students (young and old) who enjoy a little ballet, tap, jazz, or modern dance for fitness or just for fun.

Parents and grandparents can bring their little ones to the center to participate in a lively Parent Ed program—the perfect option for families looking for fun ways to learn and grow together.

Future lawyers can get their start in Coastline’s Paralegal Program, which will also be based at this site.

The Newport Beach Campus will also serve the needs of students with disabilities. Coastline is already a leader in providing special programs and services for the disabled, and has been operating the acclaimed Acquired Brain Injury (ABI) program for more than 30 years. The college is anxious to give this stellar program a permanent home in Newport Beach.

When you combine these course options with a stunning building, state-of-the-art technology, and top-notch student services, you realize that the Coastline Newport Beach Campus is poised to become a sought-after jewel atop Newport’s majestic hillside. And, when you imagine yourself playing a role in making all of this possible, it’s hard to not get involved with a project like this one.

**Art Gallery**

The Coastline Art Gallery is currently located near the intersection of Brookhurst and Adams in Huntington Beach. Relocating the Gallery to Newport Beach – as part of the Newport Beach Campus – allows the college to showcase works of art to the general student population and enhances the college’s capabilities for hosting art-themed events and activities.
Unlike most colleges, Coastline does not have a traditional campus. Instead, instruction is offered at approximately 30 sites throughout the Coast Community College District. These teaching sites include high schools, office buildings and many other facilities.

In addition to these neighborhood sites, the college has three main mini-campuses based in Costa Mesa, Garden Grove and Westminster, with an administration building (offering enrollment services, counseling, a bookstore, and more) in Fountain Valley. At Coastline, students can choose to take courses to fulfill their general education transfer requirements, or explore exciting vocational programs like Biotechnology and Informatics. In addition, Coastline also offers a renowned English as a Second Language (ESL) program and a unique Acquired Brain Injury (ABI) program.

Coastline Community College has an international reputation as one of the nation’s most innovative institutions. Founded in 1976, Coastline is committed to student success through accessible and flexible education within and beyond the traditional classroom. A majority of students take at least one class via the college’s state-of-the-art Distance Learning program, which allows flexible learning via the internet, CD-ROM, Emmy award winning telecourses, and even classes on hand-held PDA.

The college also forms progressive and unique relationships with business and industry. For example, Coastline has combined efforts with the Workforce Investment Board to operate the Orange County One-Stop Centers, which offer employment services for individual job-seekers and for businesses. In addition, Coastline’s Contract Education program includes an extensive program that allows enlisted members of the U.S. Military to easily pursue an education (mainly via Distance Learning) at Coastline.

Coastline is part of the Coast Community College District, which also includes Orange Coast College and Golden West College.

About the Coast District

Coastline is part of the three-college Coast Community College District, which includes sister colleges Golden West College and Orange Coast College. The District is governed by an elected Board of Trustees.
About... the foundation

Mission Statement
The mission of the Coastline Community College Foundation is to support students through scholarships, endowment and other financial programs to expand the capacity to meet the diverse needs of Coastline students and the community.

Sue Gordon is the Vice President of Environmental and Public Affairs at Rainbow Disposal and also a Foundation Board member.
In 1984, it became obvious to the Coast Community College District Board of Trustees that private funding had become a necessary supplement to enable the District’s three colleges to sustain their high level of quality and innovation. The time arrived to develop new funding mechanisms for our community college system. In November 1985, Coastline Community College Foundation held its first official meeting as an incorporated 501 (C) (3) organization. Ever since, the Coastline Foundation has served the college as an independent organization with a full board of directors, staff allocated by the college, and a full range of activities and services to the college.

Coastline’s current and future student population depends on the support that the Coastline Foundation provides. The Coastline Foundation plays a significant role in the life of the college and provides funding for computer equipment, scholarships, student activities and events, classroom enhancements, and more. In addition, the Coastline Foundation coordinates major fundraising event and campaigns for the college, including planned giving, naming opportunities, sponsorships, and partnerships.

The Coastline Foundation continually searches for new and innovative ways to serve the Coast District community, including Newport Beach. As we expand our overall reach by bringing a new campus to Newport, we ask for your involvement in expanding our Foundation—and its mission—throughout the area as well.

To get involved today, please call (714) 241-6154 or e-mail foundation@coastline.edu.
COASTLINE COMMUNITY COLLEGE
President: Loretta P. Adrian, Ph.D.

COAST COMMUNITY COLLEGE DISTRICT
Chancellor: Ding-Jo H. Currie, Ph.D.
Board of Trustees: David A. Grant, Mary L. Hornbuckle, Jim Moreno, Jerry Patterson, Lorraine Prinsky, Ph.D., and Student Trustee.

Accreditation: Coastline is accredited by the Western Association of Schools and Colleges, a nationally recognized regional accrediting agency.
