

College Selection Process

The ISDA application review committee will consist of: the three college International Student Program directors and one District representative.

The campus selection process shall be as follows:

- The student shall go to the ISDA website and click on the three college website links and review both the college and the international student program information under [Important Links](#).
- After reviewing the three colleges' information, the student may indicate either an initial college preference or indicate that they have no preference.
- If the student indicates an initial college preference, the ISDA application committee will review the student's application (with particular attention to the personal statement) and will either accept the student's college preference or recommend an alternate college. In the event that the committee recommends an alternate college, it will provide the student with the reasons for their recommendation. The student will make the final choice of the college.
- If the student does not indicate a college preference, after reviewing the student application, the ISDA application committee will assign the student to a college.
